EDUCATION

ADA University **Baku, Azerbaijan**

Bachelor in Information Technologies (GPA 2.91) **Expected May 2026**

- Selected coursework: Programming Principles 1, Programming Principles 2, Info Systems, Intro to Hardware and Software, Web and Mobile 1 & 2, Database systems, Computer Networks, Calculus 1 and 2, Physics 1, Linear Algebra, Discrete Structures, Cyber Security Fundamentals, Systems Analysis & Design, IT Project Management, ML, AI

ADA School **Baku, Azerbaijan**

93/100 at "SEC" math at 11th grade

Relevant Experience

Caspian Innovation Center **Baku, Azerbaijan**

Backend Developer Internship July 2025 – August 2025

- Contributed to the development and optimization of backend systems using **ASP.NET Core, C#, Entity Framework Core, and SQL Server**.
- Assisted in building, testing, and debugging backend functionalities, ensuring clean, maintainable, and efficient code.
- Designed and maintained **database schemas and API documentation**, supporting integration with frontend teams.
- Resolved bugs and performance bottlenecks, improving backend reliability and efficiency.
- Collaborated in Agile team workflows, participating in **code reviews, workshops, and technical discussions** to strengthen backend expertise.

AzInTelecom **Baku, Azerbaijan**

Backend Developer Internship February 2026 – Present

- Gaining hands-on experience working on real-world backend development projects in an Agile environment.
- Designing and optimizing database schemas to support scalable application features.
- Collaborating closely with frontend developers to integrate APIs and ensure smooth system functionality.
- Participating in team meetings, sprint planning, and code reviews as part of the development workflow.

ACTIVITIES & AWARDS

Purple Comet Math Olympiads at 11th grade- 2nd place

COP 29 Volunteer- GSE team

Codecademy Full-Stack Developer Path (Backend-focused) – January 2025 - August 2025

PROJECTS DEVELOPED

Recipe Manager Web App

React.js | JSON Server | REST API | EmailJS | CSS Modules

Developed a full-featured recipe management application using React, enabling users to create, edit, delete, and organize recipes with attributes such as ingredients, steps, tags, and difficulty levels. Implemented search, filter, and sort functionalities with real-time updates via JSON Server.

Integrated drag-and-drop for recipe reordering, infinite scroll for seamless UX, and recipe sharing via downloadable JSON using EmailJS. Ensured a responsive and polished UI with custom CSS and component-based architecture.

Console E-Commerce Application
C# | .NET | Onion Architecture | Entity Framework Core | MS SQL Server
Designed and developed a layered console-based e-commerce system following the Onion Architecture and Domain-Driven Design principles. Implemented core domain models (Products, Orders, Customers, etc.) with business rules, DTOs, and repository patterns. Utilized Entity Framework Core for data access and migrations with a normalized SQL Server schema. Key features include user authentication, product browsing, cart and order management, admin tools, and basic inventory control. Ensured clean architecture adherence, SOLID principles, and modular maintainability.

Additional Information

Languages: Azerbaijani (native); English (fluent); Russian (intermediate)
Technical Skills

- **Languages:** Python, C/C++, C#, JavaScript, Java
- **Frontend:** CSS,HTML, React
- **Databases:** SQL, PostgreSQL, MS SQL
- **Tools:** Git, Postman, VS Code, Visual Studio

Soft Skills: Groupwork, Problem solving, Adaptability
Interests: Technology trends, systems thinking, teamwork through sports, high-performance strategy in motorsports, cognitive challenges through gaming
